

Contamination Levels Allowed / To Date

Country/ies	Allowable Contamination Level	Source	Notes
Brunei	0%	Results of Country Survey: The Asian Network for Prevention of Illegal Transboundary Movement of Hazardous Wastes, 2020	See chart on p. 17.
China	0%	Solid Waste Law, Articles 23, 24, 124 (1) Analysis	China had a contamination level of 0.5%. At the end of 2018 they banned all solid waste imports (e.g. plastic waste) including non-hazardous plastic waste, effectively making the contamination level moot.
European Union	Proposed to be 2% for trade outside of E.U.	Correspondents' Guidelines No 12 Draft	See 13, 24, and 26.
Hong Kong	0.5%	Environmental Protection Department	See "Note 3".
Indonesia	2%	Ministerial Decree	See "SECOND".
Malaysia	0% of non-plastic contaminants, 5% other plastics other than target polymer	Translated Letter from Department of Environment Original Letter from Department of Environment Results of Country Survey: The Asian Network for Prevention of Illegal Transboundary Movement of Hazardous Wastes, 2020	See chart on p. 17.
Turkey	1%	Government Letter	Translated excerpt from condition (6): "The companies that... import the wastes that are determined to contain foreign matter more than 1% by weight in the content of the imported wastes are the waste importers. Registration documents are canceled and waste importer registration document requests are not evaluated for 5 years, and the bank guarantee is recorded as income in the account of the Ministry's Revolving Fund."
Vietnam	2% if non-plastic contaminants, and 20% other plastics other than the target polymer	Results of Country Survey: The Asian Network for Prevention of Illegal Transboundary Movement of Hazardous Wastes, 2020	See chart on p. 17.
